

LESSON 10.1 Practice A
For use with pages 650–658

Match the notation with the term that best describes it.

- | | |
|------------------------------|----------------------------|
| 1. D | A. Center |
| 2. \overleftrightarrow{FH} | B. Chord |
| 3. \overline{CD} | C. Diameter |
| 4. \overline{AB} | D. Radius |
| 5. C | E. Point of tangency |
| 6. \overline{AD} | F. Common external tangent |
| 7. \overleftrightarrow{AB} | G. Common internal tangent |
| 8. \overline{DE} | H. Secant |

Use the diagram at the right.

- What are the diameter and radius of $\odot A$?
- What are the diameter and radius of $\odot B$?
- Describe the intersection of the two circles.
- Describe all the common tangents of the two circles.

Use $\odot P$ to draw the part of the circle described or answer the question.

- Draw a diameter \overline{AB} .
- Draw tangent line \overleftrightarrow{CB} .
- Draw chord \overline{DB} .
- Draw a secant through point A .
- What is the name of a radius in the figure?

Tell how many common tangents the circles have and draw them.

In the diagram, \overline{BC} is a radius of $\odot C$. Determine whether \overline{AB} is tangent to $\odot C$. Explain your reasoning.

In the diagram, \overline{AB} is tangent to $\odot C$ at point B . Find the radius r of $\odot C$.

\overline{JK} is tangent to $\odot L$ at K and \overline{JM} is tangent to $\odot L$ at M . Find the value of x .

33. **Softball** On a softball field, home plate is 38 feet from the pitching circle. Home plate is about 45.3 feet from a point of tangency on the circle.

- a. How far is it from home plate to a point of tangency on the other side of the pitching circle?

- b. What is the radius of the pitching circle?
